

# Welcome to the CAMAI Community Health Clinic

## Covid-19 Testing Site

The Alaska State mandates for COVID screening, combined with the annual influx of thousands of seafood workers, fisherman and tourists to the Bristol Bay Borough has presented a challenge to our local health system and the laboratories processing samples statewide. We understand your desire for quick turnaround and results reporting, and we are working hard every day to refine the process to get you the information you need regarding your COVID test. Due to the volume of testing we do both here and on site at the processors, ***please note the following:***

- The majority of our samples are packaged for send out to laboratories in Anchorage / Fairbanks. ***Turnaround for results has ranged from 2 to 6 days.***
- We can accommodate up to 80 tests per day with our same day unit. Priorities for same day tests will include:
  - Special requests from the medical providers at the processors for potentially symptomatic individuals
  - Fishermen
  - Local lodges/guide services
- Community members who are concerned about COVID exposure or who have any symptoms consistent with COVID are asked to contact the clinic directly for a provider evaluation. The clinic also has the capability to do limited same day testing. (907) 246-6155

**\*PLEASE DO NOT CALL THE CLINIC FOR YOUR TEST RESULTS! \***

You may inquire about your results by emailing: [covidresultscchc@outlook.com](mailto:covidresultscchc@outlook.com)

OR

Return to the “Entrance” area at the testing site for a paper copy of your results. Same day test results will be available the next day. “Send out” test results may require up to 6 days before they will be available for pickup.

**In the instance of a positive COVID test, testing site staff will contact you directly**
